1. Write a JavaScript program that accepts two numbers in two prompts and displays the larger one in the console.

2. Write a JavaScript conditional statement to find the sign of a number. Display an alert box with the specified sign.

Sample: 3
Output : The sign is +

Sample: -5
Output : The sign is -

3. Write a JavaScript program that accepts five numbers in five prompts and displays the larger one in the console.

4. Write a JavaScript for loop that will iterate from 0 to 15. For each iteration, it will check if the current number is odd or even, and display a message to the screen.
Sample Output :
"0 is even"
"1 is odd"
"2 is even"

----

5. Write a JavaScript program which computes the average marks of the following students Then, this average is used to determine the corresponding grade.

The grades are computed as follows :

Range	Grade
<60	F
<70	D
<80	C
<90	B
<100	A

6. Write a JavaScript program which iterates the integers from 1 to 100. But for multiples of three print "Fizz" instead of the number and for the multiples of five print "Buzz". For numbers which are multiples of both three and five print "FizzBuzz".

7. Write a JavaScript program to construct the following pattern, using a nested for loop.

```
*
* *
* * *
* * * *
* * * * *
```
